

Envision strives to improve the quality of life for people of all ages who are blind or visually impaired and helps adults acquire professional skills for today's workforce.

We instill inspiration, opportunities and community through innovative outreach, rehabilitation, education and research programs. And through the power of employment, we help people gain life skills and relevant work training for jobs, including production of high quality American-made products.

Funds generated from our manufacturing, distribution and fulfillment business along with donations and grants drive Envision's mission services.

Since 1933, our passion has been to create possibilities for talented individuals to thrive and live a life with purpose and meaning.

ENVISION THE POSSIBILITIES

Please thoughtfully consider a gift to Envision to ensure individuals living with blindness or low vision have the opportunity to become vibrant, successful and productive citizens.

EMPLOYMENT

Our employees gain a sense of independence, explore their potential and affirm their abilities. With positions in manufacturing, customer service and management, people who are blind or visually impaired can do anything they set their minds to accomplish. Envision's William L. Hudson Workforce Innovation Center offers skilled employment opportunities and training as well as consultation with organizations to incorporate digital accessibility into their workplace so they can hire people with disabilities. Envision Xpress operates 16 retail stores on U.S. military bases in 10 states and provides jobs and job training to individuals who are blind or low vision.

EARLY CHILD DEVELOPMENT

The Cathy G. Hudson Envision Child Development Center provides a one-of-a-kind learning experience. By integrating children who are blind or visually impaired with those who are typically sighted, we provide a comprehensive learning environment that can help children and their families be prepared for their future.

COMMUNITY PROGRAMS

Envision offers a variety of community groups for seniors, adults, teens, children, and families. With an extensive arts program for all ages, youth summer camp, sporting activities, training and more, Envision designs programs with the individual in mind. These programs help provide socialization, support and the ability to be who they want to be. National programs like Level Up and College Success Program give students a solid path forward from middle school through college.

REHABILITATION

Thousands of people who are blind or low vision have been impacted by the Bicknell

Envision Vision Rehabilitation Center. Working in partnership with optometrists and ophthalmologists, our licensed and certified low vision professionals work alongside patients of all ages to maximize their functional vision and maintain independence by exploring new ways of doing everyday tasks.

EDUCATION

Our public education spectrum includes outreach, seminars, education resource guides, assistive technology camp for children and much more. The Envision Conference is a national low vision rehabilitation and research conference that brings vision professionals from various fields and numerous countries together to further expand professional education opportunities.

RESEARCH

Envision is committed to engaging in research that addresses practical issues in the clinical treatment and rehabilitation of persons who have low vision or blindness. The Gigi & Carl Allen Envision Research Institute works to improve outcomes and close practice gaps in low vision rehabilitation, and also serves to address a larger plan and mission promoted by the National Eye Institute.
